

ESSENTIAL TOOLS & WEB PARTS FOR MICROSOFT SHAREPOINT®

See demos of all these products at the booth, or download a trial from www.lightningtools.com

*Available for SharePoint On-Premises and SharePoint Online.

Lightning Conductor: SharePoint® Content Aggregation with Style

Lightning Conductor provides efficient and simple-to-use SharePoint® 2013 cross-site collection aggregation to roll-up SharePoint Content easily across site collections or web applications. You can build powerful views without the need to write code. Include conditional formatting, calculated columns and multiple level grouping.

DeliverPoint: SharePoint® Permissions Management made easy

DeliverPoint is an in-context permissions reporting and management tool for SharePoint® to empower Site Administrators. In-context reporting, copying, transferring or deleting permissions in bulk are just some of the many features of DeliverPoint.

BCS Meta Man: External Data in SharePoint within Minutes

With BCS Meta Man, you can build connections to nearly all external data sources allowing SharePoint® to become the organization's central hub for business information.

Data Viewer: View External Data & Add Styling (Now available as a Client Side Web Part SPFx)

Data Viewer displays external and internal data from the cloud or from on-premises in SharePoint® Online. A required tool on any dashboard to present meaningful data to your users.

Chart: Build Powerful Charts on SharePoint Lists or External Data

The SharePoint Chart web part provides users with the ability to create their own charts on SharePoint content or external data. Using a simple wizard, you can have a chart fully configured within your SharePoint dashboard in less than 15 minutes!

Social Squared: Enterprise Discussion Forums *New Mobile App

Social Squared is an enterprise discussion forum tool using SharePoint® as a platform. This mix promotes SharePoint® user adoption through social media, as well as aiding communication no matter where the user is located.

The right Tools to get the job done faster.

Meet the team, chat with the co-author of 'Microsoft SharePoint® 2010 Business Connectivity Services', and enter our great competition!
