

Efficient Permissions Management:

DeliverPoint simplifies and streamlines the management of SharePoint permissions, reducing administrative workload and the risk of errors.

Enhanced Security:

It strengthens data security by ensuring that only authorized users have access to sensitive information.

Compliance and Auditing:

DeliverPoint's robust auditing and reporting capabilities help organizations meet compliance requirements and internal policies.

Efficient Collaboration:

Proper permissions management enables effective collaboration while maintaining security.

Reduced Administrative Overhead:

Bulk Permissions Management and reporting tools in DeliverPoint lower administrative burdens.

Granular Control:

It offers precise control over permissions at various SharePoint levels.

User Adoption:

Improved user experience encourages greater adoption of SharePoint resources.

DeliverPoint – SharePoint Permissions

DeliverPoint permissions management by Lightning Tools offers numerous benefits for organizations seeking efficient and effective control over their SharePoint environments. It simplifies the complex task of managing permissions, allowing administrators and content owners to easily manage, review, and audit user access rights within SharePoint sites, lists, and libraries.

DeliverPoint provides a user-friendly interface with comprehensive reporting and analysis tools, enabling organizations to enhance security, ensure compliance, and streamline collaboration. With its intuitive features, it reduces the risk of data breaches and minimizes administrative overhead, ultimately improving productivity and governance within SharePoint ecosystems.

- Site Owners & Site Collection Administrators can use DeliverPoint contextually to report and manage permissions across the sites and content that they manage.
- Site Owners have complete confidence as to who has access via Sharing Links to their files and folders.
- Manage permissions as a Tenant level allowing bulk permissions reporting and permissions management.

Streamlined Permissions

Management: DeliverPoint simplifies the complex process of managing permissions in SharePoint. It offers a user-friendly interface that makes it easier for administrators to assign, review, and modify permissions, saving time and reducing the risk of errors.

Enhanced Security: Effective permission management is critical for data security. DeliverPoint helps organizations ensure that only authorized users have access to sensitive information, reducing the risk of data breaches and unauthorized access.

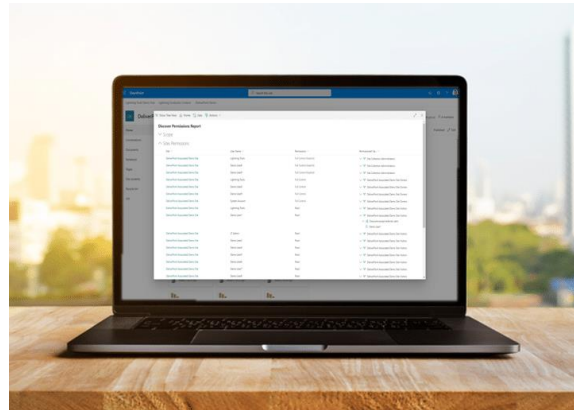

Product Features and Benefits

About Lightning Tools:

Lightning Tools, founded in 2007 by Microsoft 365 Apps and Services MVP Brett Lonsdale, is a reputable Microsoft Partner known for its expertise in SharePoint and related technologies. With ISO 27001 and ISO 9001 certifications, Lightning Tools is committed to maintaining high standards of security and quality in its products and services, making it a trusted choice for organizations seeking effective solutions in the Microsoft ecosystem.

Customer Success:

Lightning Tools is dedicated to its customers' success by offering comprehensive support, regular product updates, and a commitment to understanding and addressing the unique needs of each client. They prioritize customer feedback, ensuring their solutions evolve to meet evolving challenges in the SharePoint and Microsoft 365 ecosystem, ultimately helping organizations maximize the value of their investments and achieve their business goals.

DeliverPoint Features

DeliverPoint provides the following features:

Discover Permissions: Site Owners can run permission reports within the SharePoint interface across multiple sites, lists, libraries, folders or files. The permission reports are clear to understand and include everyone who is permissioned even if they are granted through Active Directory Security Groups.

Sharing Links: Report on sharing links across an entire site or site collections to gain an understanding in one report of all sharing links, who they are shared to, and who created the sharing link.

Manage Permissions: Copy, Transfer, Delete, Revoke and Grant permissions across multiple scopes as people leave or join your organization.

Clone Permissions: Clone permission sets between files, folders, lists, libraries and sites.

Schedule Permission Reports: Schedule long running permission reports at predefined periods.

DeliverPoint offers a versatile solution for managing permissions in SharePoint environments, catering to both SharePoint Online and SharePoint On-Premises users. For SharePoint Online, DeliverPoint is seamlessly integrated with the SharePoint Framework, making installation a breeze. As a result, organizations using SharePoint Online can easily deploy DeliverPoint to enhance their permission management capabilities. This integration extends to Microsoft Teams as well, ensuring that DeliverPoint can be used effectively within Teams' collaborative environments. With its SharePoint Framework foundation, DeliverPoint not only simplifies installation but also ensures compatibility and scalability within the SharePoint Online ecosystem.

Moreover, DeliverPoint recognizes the diverse needs of organizations, including those that rely on SharePoint On-Premises solutions. For such users, DeliverPoint is available as a Farm Solution. This means that organizations operating within an On-Premises SharePoint environment can leverage DeliverPoint's robust permission management features to maintain control and security over their SharePoint resources. Whether an organization chooses SharePoint Online or SharePoint On-Premises, DeliverPoint's flexibility in deployment options ensures that it can adapt to the specific requirements of each environment, providing a consistent and effective permissions management solution.
