

LightningTools

Centralized Content Management:

Display content from lists, libraries, other Microsoft 365 Apps, and External Content in one centralized location. This simplifies content management and improves accessibility saving your organization time when users cannot find content.

Improved User Experience:

Create more intuitive and user friendly interfaces for SharePoint and Teams users by making it easier to find relevant information.

Customized Views:

Create tailored views of content for your users allowing content to be presented in a meaningful and helpful way to improve business decisions.

Cross-site and Cross App collaboration:

Collaborate with peers across sites and across apps helping distributed users to work together.

Simple to configure:

Site Owners and Teams Owners can configure powerful views of aggregated content without any coding experience..

Performance

Aggregate content in real time or near real time through search indexed content for optimal performance.

Lightning Conductor – Content Aggregation

The Lightning Conductor Content Aggregation tool by Lightning Tools is a versatile solution designed to streamline content management and enhance user experiences within SharePoint and Microsoft Teams environments. It offers the unique capability of aggregating content from various sources, including SharePoint lists and libraries, Microsoft 365 Groups, applications like Planner and OneDrive, and even external content systems like JIRA and Salesforce. This broad range of integration options allows organizations to consolidate data and information from diverse sources into a centralized hub.

In addition to its cross-platform functionality, Lightning Conductor provides customization options for tailored content views and real-time updates. It empowers users to efficiently collaborate across different SharePoint sites, enhance content discovery, and optimize performance. This makes it an indispensable tool for organizations looking to improve usability and efficiency across SharePoint, Microsoft Teams, and external data sources, ultimately simplifying content management and fostering productive collaboration.

- Aggregate content from lists, libraries, Microsoft Graph, and external sources like JIRA and Salesforce into one centralized location for simplified access and management.
- Create tailored content views to suit your organization's needs, improving user experiences and making it easier to find and work with relevant information.
- Facilitate cross-site collaboration and content discovery, optimizing performance and streamlining content management across various platforms, including SharePoint and Microsoft Teams.

Increased Productivity: By centralizing content from multiple sources and providing customized views, the tool improves efficiency and saves users' time when accessing and working with information. This leads to increased productivity across the organization.

Cost Savings: Streamlining content management reduces time and effort when looking for content, and avoids the duplication of content when it cannot be found.

Improved Collaboration: Enhancing cross-site collaboration and content discovery capabilities fosters better teamwork and knowledge sharing. Teams can collaborate seamlessly within SharePoint & Teams.

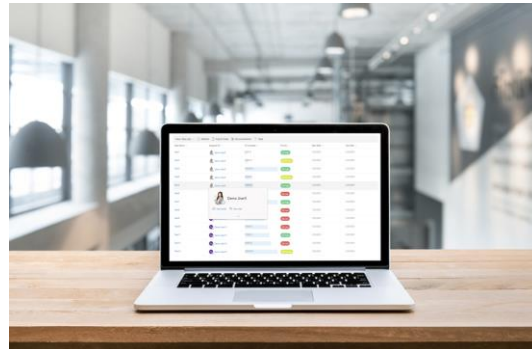

Product Features and Benefits

About Lightning Tools:

Lightning Tools, founded in 2007 by Microsoft 365 Apps and Services MVP Brett Lonsdale, is a reputable Microsoft Partner known for its expertise in SharePoint and related technologies. With ISO 27001 and ISO 9001 certifications, Lightning Tools is committed to maintaining high standards of security and quality in its products and services, making it a trusted choice for organizations seeking effective solutions in the Microsoft ecosystem.

Customer Success:

Lightning Tools is dedicated to its customers' success by offering comprehensive support, regular product updates, and a commitment to understanding and addressing the unique needs of each client. They prioritize customer feedback, ensuring their solutions evolve to meet evolving challenges in the SharePoint and Microsoft 365 ecosystem, ultimately helping organizations maximize the value of their investments and achieve their business goals.

Lightning Conductor Features

The Lightning Conductor provides the following features:

Aggregate from: The Lightning Conductor can be configured to aggregate from SharePoint lists & libraries across different site collections or across hubs and associated sites. Microsoft Graph can be used (without code) to aggregate from Apps such as Planner, and OneDrive. External Connectors can be used to aggregate from external sources such as JIRA or Salesforce.

Display: The Lightning Conductor offers four methods of displaying content. The GridView can be used to provide users an intuitive method of selecting columns, applying conditional formatting, grouping, summary functions, and calculated columns. Whilst views such as Calendar, Tile, Slideshow, and Gantt can be displayed using JSON or XSLT. Both JSON or XSLT can be used to create your own specific display. Finally, Adaptive Cards can be created or used for any datasource as a more simple way of creating powerful views without code.

The Lightning Conductor Content Aggregation tool by Lightning Tools is a dynamic solution that simplifies content management across SharePoint Online, Microsoft Teams (via SharePoint Framework - SPFx), and even in SharePoint On-Premises environments for list and library rollup.

This tool is a true innovation, providing powerful content rollups in a performant way. What truly distinguishes it is its commitment to aesthetics and accessibility. It's a web part that offers responsive and modern designs, making content aggregation not only efficient but also visually engaging.

In an era where data is the lifeblood of business, the Lightning Conductor stands as a symbol of efficiency and progress. It empowers organizations to create unified, visually appealing content hubs, enhancing user experiences and productivity. Whether you're in the cloud or on-premises, it's the key to unlocking the future of content management with ease. Deploy it today and witness a transformative shift in your digital landscape..
