Branding: Lightning Forms offers extensive customization options, allowing you to tailor forms to your organization's specific needs and branding requirements.

Automation: Through Lightning Forms & List Actions, add automated actions to streamline processes.

Lightning Forms Suite – SharePoint Form Design & Automation

Lightning Forms, developed by Lightning Tools, is a powerful tool that brings numerous benefits to organizations seeking efficient and user-friendly ways to design and manage business forms within Microsoft SharePoint. One significant advantage is its ability to enhance data accuracy and reliability. With Lightning Forms, organizations can create custom forms equipped with actions, validation rules and data validation checks, ensuring that users enter precise and consistent information. This feature significantly reduces data errors and maintains the quality of the data collected, which is essential for informed decision-making and streamlined business processes.

Another notable benefit of Lightning Forms is its seamless integration with SharePoint. By customising SharePoint list forms, organizations can efficiently capture, store, and manage data within their existing SharePoint environment. This integration promotes a cohesive and organized data management strategy, allowing teams to access and share information effortlessly. Furthermore, Lightning Forms' mobile-friendly design ensures accessibility on various devices, supporting the productivity and flexibility of employees who need to complete forms while on the go.

The contextual design experience of

- Lightning Forms helps you to build powerful SharePoint list forms within the SharePoint experience itself. This approach gives form designers context in a familiar environment.

- Easily add calculations and functions through the expression wizard within fields, sections, and sublists.

- Apply design to your forms for conditional formatting or exposing your brand.

- Apply automation through the action builder allowing work processes such as Approvals to be streamlined.

Lightning Forms: Lightning Forms enables Site Owners to easily customise the existing SharePoint list forms transforming them into powerful business forms.

Lightning List Actions: Apply automation at the list level allowing actions and workflow to be triggered against multiple items in bulk.

Document Generator: Generate documents from the list forms that provide a sharable, printable format to keep as records or to provide to employees, clients or suppliers.

Product Features and Benefits

About Lightning Tools:

Lightning Tools, founded in 2007 by Microsoft 365 Apps and Services MVP Brett Lonsdale, is a reputable Microsoft Partner known for its expertise in SharePoint and related technologies. With ISO 27001 and ISO 9001 certifications, Lightning Tools is committed to maintaining high standards of security and quality in its products and services, making it a trusted choice for organizations seeking effective solutions in the Microsoft ecosystem.

Customer Success:

Lightning Tools is dedicated to its customers' success by offering comprehensive support, regular product updates, and a commitment to understanding and addressing the unique needs of each client. They prioritize customer feedback, ensuring their solutions evolve to meet evolving challenges in the SharePoint and Microsoft 365 ecosystem, ultimately helping organizations maximize the value of their investments and achieve their business goals.

Lightning Forms Suite Features

Lightning Forms is a SharePoint app that enables users to design and create custom business forms within Microsoft SharePoint. Offers features such as data validation, responsive design for mobile devices, and integration with SharePoint lists. Enhances data accuracy, productivity, and data security by providing a user-friendly form design and submission process. Lightning List Actions:

Lightning List Actions empowers users to perform batch operations on SharePoint list items in bulk. Actions include capabilities like updating, deleting, or sending notifications to multiple list items simultaneously. Streamlines list based automation and saves time by automating repetitive tasks and actions on SharePoint lists

Document Generator is a SharePoint solution that simplifies document creation and generation allowing users to generate documents, based on SharePoint list data. Automating the creation of documents to save time and reduce errors and enhances productivity by enabling users to create multiple documents at once from SharePoint list data.

Lightning Forms, is implemented as a SharePoint Framework Solution (SPFx), and can greatly simplify the process of building rich and feature-packed business forms for users of both SharePoint Online and SharePoint On-Premises. Here's how it accomplishes this while offering an intuitive interface:

Ease of Form Design: Lightning Forms, integrated through SPFx, provides an intuitive and user-friendly interface for form designers. Its drag-and-drop capabilities, along with a visual designer, allow form designers to create forms with ease. This simplicity reduces the learning curve dramatically, making it accessible to a wide range of users.

Sublists Support: Lightning Forms can enable the creation of complex forms with sublists. This is particularly beneficial for scenarios where you need to capture multiple related pieces of information within a single form. Users can easily add and manage data in sublists, enhancing data organization and user experience.

Scalability: Whether in SharePoint Online or On-Premises, Lightning Forms can be scaled to meet the evolving needs of your organization. This scalability is essential for businesses that anticipate growth and increased form usage over time.
